

Get started with your Terraria server

Connect to Your Server

Use the IP address and port available on the top of the dashboard page on your panel to join your server.

Launch Terraria, select **Multplayer**, then **Join via IP**, and enter your server address. If a password is configured, you'll be prompted to enter it before joining.

Basic Commands

Some commonly used Terraria server commands :

Command	Description
help	Display available commands.
exit	Stop the server safely.
save	Save the world manually.
kick <player>	Remove a player from the server.
ban <player>	Ban a player.
password	Change the server password.

With the Ogamecloud command autocomplete juste enter " / " in the console to see and select all the server command.
